

CZECH ORIENTEERING CHAMPIONSHIP MIDDLE DISTANCE

CZECH REPUBLIC

ČERNÉ VODĚRADY 21-22 JUNE 2008

WELCOME TO CHAMPIONSHIP

Dear Orienteering Friends,

Orienteering club OK SPARTA PRAHA invites you to come to the top level race of spring part of season 2008 and that's Czech Republic Orienteering Championship – Middle distance, which will be held on 21. – 22. June 2008. It will be the last home test before the most important season event – World Orienteering Championship at Olomouc which will take part on 10.-20. July 2008. The assembly area in Černé Voděradý will provide a high standart to competitors and visitors. In that connection we would like to thank the owners of the area for their kindness, support and goodwill during dealing with organisers. The competition area at National Nature Preserve Voděradské Bučiny has already been used for elite orienteering competitions due to its variety technical terrain, and I believe that at this time you will also leave our competition full of enjoyment and new orienteering experiences. Your delight will be our reward.

We are really looking forward to you!

On behalf of organising committee,

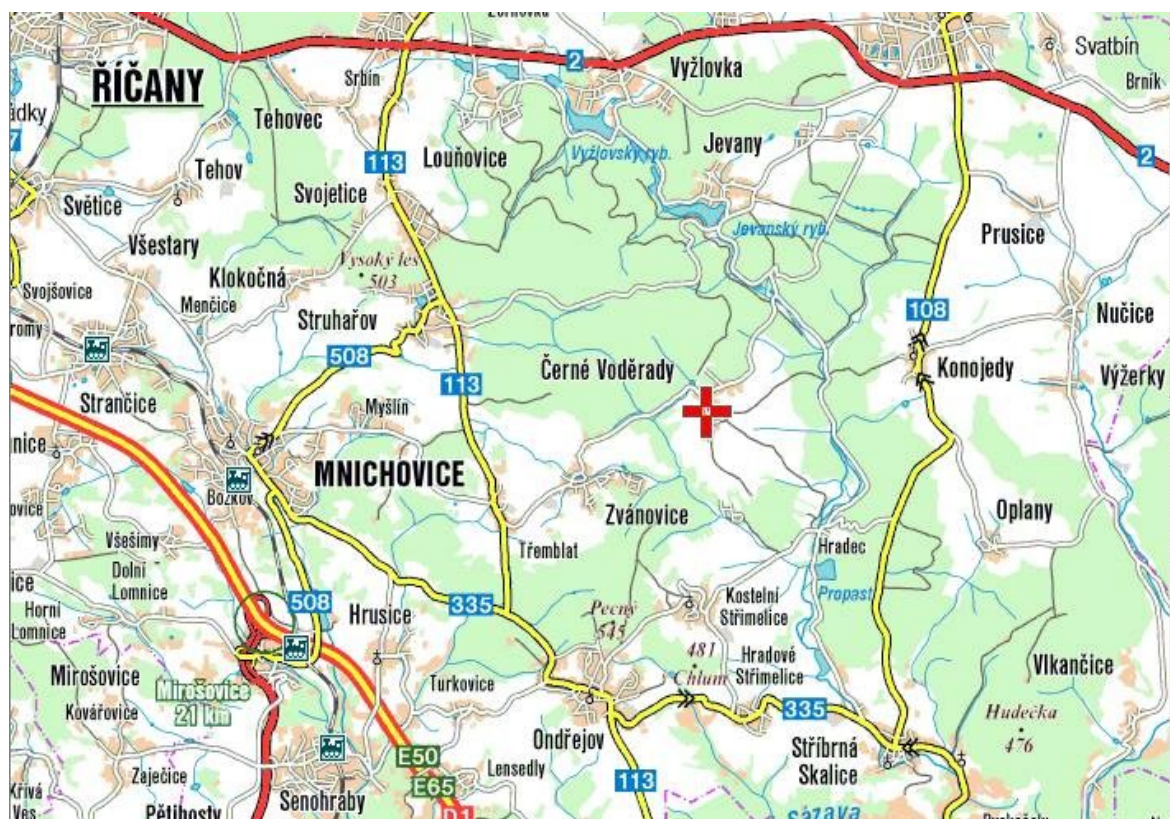

Michal Hojný, Event Director

PROGRAM, TYPE AND DATE OF RACE

- **Saturday 21st June 2008 morning = Czech Republic O-Championship – Middle distance – semifinal**
- Saturday 21st June 2008 afternoon = Czech Republic O-Championship – Sprint – Bohnice Medical Institution Area (organised by Kotlářka Praha)
- **Sunday 22nd June 2008 morning = Czech Republic O-Championship – Middle distance – final**

COMPETITION AREA

- 30 km to the Southeast from Prague
- Border by towns Zvánovice – Černé Voděradý - Struhařov
- The area is at the border of National Nature Preserve Voděradské bučiny
- Altitude from 400 to 530 meters above sea-level.
- Excellent transport from Prague airport Ruzyne and from motorway D1
- Good connection to the Czech Republic Sprint Championship at Bohnice Medical Institution Area (a part of Prague)

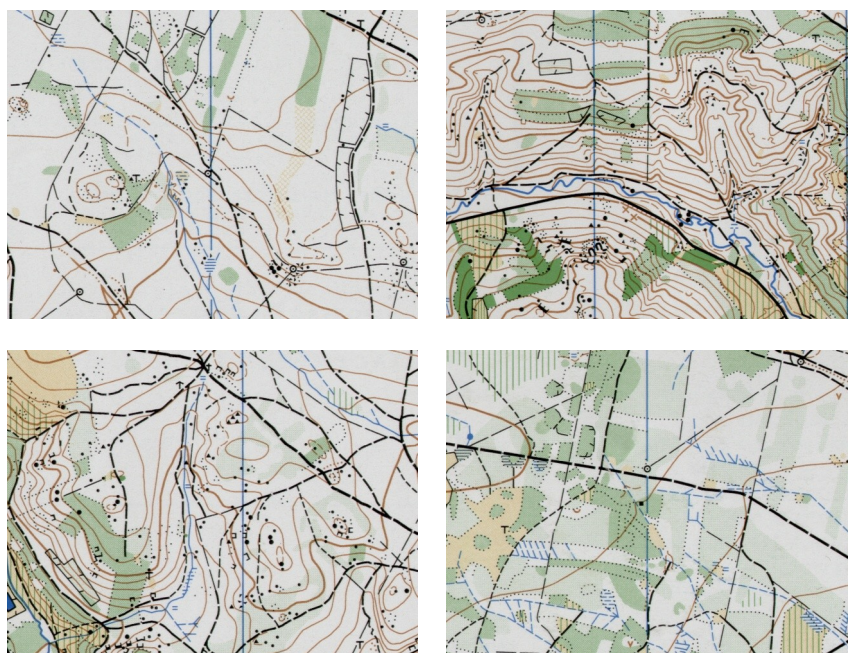

TERRAIN DESCRIPTION

There are two different kinds of terrain in the area – on the one hand flat part with many single rocks and stony fields on the north and on the other hand steep valley with many smaller sub-valleys with rocky cliffs and stones. Vegetation is very various, from clear beech woods to mixed forest with thicker green parts, almost without any seasonal undergrowth. Rich network of forest paths and roads at altitude from 400 to 530 meters above sea-level.
